Collecta 2022 Collection

2022 Collection

A natural world in miniature

Our Values

Safety, attention to detail, authenticity and excellence.

Our Vision

To create the natural world in miniature.

Our Mission

To inspire a love of nature and sense of wonder at its discovery of creatures, through our range of authentically detailed, hand painted miniature animal figurines.
To stimulate creativity, through sensory play and imagination, and to encourage curiosity about the natural world - play, learn, collect, develop.
To bring to life the prehistoric world and foster an understanding of the evolution and extinction of species. To highlight the importance of protecting our endangered species and their habitat.
To bring the highest standards of craftsmanship, materials and safety to our collectable range. The play models are solid, safe in water, and dishwasher proof, ensure they are hygienically safe.

Horse Country

Deborah McDermott

Deborah is a sculptor living in Southern California. As a sculptor, she observes the anatomy, movement and expressions of horses as well as their unique qualities that make each horse an individual.

Deborah McDermott

Prehistoric World

Anthony Beeson

2022 sees CollectA enter its sixteenth year of existence in producing models of Prehistoric fauna and flora. It continues in its mission to both educate and to provide the greatest amount of creative play with the accuracy of its models.

2021 saw a slow revival from the problems engendered in production and distribution by the Covid-19 pandemic. Notwithstanding some disruption in production this year, my colleague, the sculptor Matthias Geiger and I, have produced another varied selection of animals for CollectA's Prehistoric Animals series.

In CollectA's Deluxe series we have a new model of the Late Cretaceous North African Spinosaurus swimming. It has an articulated mouth. Also in this range, we offer a model of the large hadrosaur Edmontosaurus, that lived in North American in the late Cretaceous era. These are joined by other Late Cretaceous animals; a new Triceratops and a model of Pteranodon sternbergi. Both have articulated mouths. Although in scale with the Deluxe line, the Pteranodon model will be included in the Popular series price range.

This year CollectA are not issuing any figures in the Popular range, as time and other circumstances were against Matthias and I, but we have already started on some for 2023.

In our Other Prehistoric Animals range we introduce the large, Late Triassic, Polish archosaur Smok, that preyed upon Lisowicia (that CollectA made an award winning model of in 2020). Smok will again have an articulated mouth. Also in this range we introduce a revised model of the large Oligocene mammal, Paraceratherium that incorporates new ideas as to its original appearance and that we hope will find favour.

To our series of Prehistoric Sea Creatures, within this range, is added the spectacularly shelled Late Permian nautiloid Cooperoceras.

Wishing you all a safe, happy and educational year of play and collecting.

Matthias Geiger

Matthias is a German sculptor with a great passion for Dinosaurs. In collaboration with Anthony Beeson, he brings life to CollectA's vision of prehistoric animals.

All our models are individually hand crafted to the highest standards and made with only the finest and safest materials. As part of our ongoing product improvement program, we continually strive to improve and upgrade all our models in an effort to bring you the best possible collection. All our products are rigorously tested to ensure they meet the highest safety standards. We hope you enjoy our models as much as we have enjoyed creating them.

Building a natural world in miniature for collectors.

• 88967
Anglerfish

L 12.8 x H 6.4 cm
L 5 x H 2.5 in

The female has a piece of modified dorsal fin ray that protrudes above her mouth like a fishing pole and can illuminate itself. The male angler fish is much smaller compared with the female and not equipped to eat. He lives as a parasite onto the female and solely for fertilizing her eggs.

In Celtic and northern European folklore, the unicorn is depicted as a white horse-like animal with a long horn.

In the middle ages, it was commonly described as an extremely wild woodland creature, a symbol of purity and grace

Celtic Family Symbol

The Celtic symbol made up of three conjoined spirals in rotational symmetry is called Triskelion and means "three legs". This Triple Spiral represents the family as mother-father-child, eternity as life-death-rebirth and past-present-future. It also represents the three Celtic worlds: the spiritual world, the present world and the celestial world.

The Tree of Life

It is a representation of harmony and balance in nature. The Tree of Life symbolized strength, a long life, wisdom, and rebirth. The Celts also believed that they actually came from trees, and considered them magical, living beings. Trees were said to guard the land and acted as a doorway into the spiritual world.

Celtic Knot

This pattern represents the interconnection of life and our place within the universe. Celtic knots are referred to as endless knots due to the fact that they do not have an end or a beginning. The endless knots represent the eternalness of nature.

Sailor's Knot

This design features two intertwined ropes and may have been created by sailors during their long voyages as a means of remembering their loved ones. The Sailor's knot is symbolic of friendship, affection, harmony and love.
